Report on Industrial Visit at Shri Bhagirath Textiles Pvt. Ltd.

An Industrial visit was scheduled for B. Tech. First year, second semester students on 16th June, 2022 to "Shri Bhagirath Textiles Pvt. Ltd.", (S. B. Rander Group). We started traveling from GNI campus at 09:30 am for Shri Bhagirath Textiles Ltd. along with 61 students and faculties namely Prof. Yashraj Chopkar, Prof. Sandeep Bhongade, Prof. Divya Lande, and Prof. Pranali Kharwade. We reached at Shri Bhagirath Textiles Ltd. at 10.20 a.m.

Visit was started with the prior approval by Mr. Prateek Bajpai, General Manager, HR, he briefed us about the company. After briefing they divided the students in three batches, then Production Manager Mr. Yadav, Production Officer Mr. Awari & Production Officer Mr. Ramlochan guided us about the variety, capacity, wide range & supply of products in the unit (Discussion session) & observation of the plant. Company was founded in 1996 in the small village of Mohali in Nagpur. Shri Bhagirath Textiles is a testimony to growth driven by adherence to quality and commitments. Which was started by Mr. Ramesh Rander as a humble unit of 12,678 spindles synthetic spinning capacity has grown many folds over the years. Since then, the company has come a long way doubling its capacity over the years and adding cotton open end yarns in its product portfolio. Today, Shri Bhagirath Textiles is a highly professional organisation, with an ISO 9001:2008 Quality Management Certification, wide range of products on offer, global reach and a robust infrastructure to boast.

The company has added 2200 rotors offering open end yarns that makes it India's first 100% Viscose Open plant. It also has a completely automatic cotton ginning plant with an annual capacity of 70,000 bales. Going forward, SBTL aims at expanding its reach in various established and emerging global markets. For achieving this, the company is committed to investing in the key pillars of technological advancements, infrastructural strengths and people skills. We, at SBTL, always look forward to be of assistance in providing the best quality products to all our clients and are committed to upholding the integrity of relationship above all.

They offer a wide variety of 100% synthetic and blended yarns in 15 to 30 single & double counts from our ring spun unit.

Category	Blend	Count Range	Production Capacity (Monthly)
Ring Spun	Poly viscose, Poly cotton	15s to 30s Single & Double Ply	225 tonnes
